

Class 1 Sound Level Meter NL-63 (With low-frequency sound measurement function)

Class 1 Sound Level Meter NL-53

Class 2 Sound Level Meter NL-43

Exploring the possibility of Noise Measurement

Class 2
Sound Level Meter
NL-43

Class 1
Sound Level Meter
NL-53

Class 1 Sound Level Meter
(With low-frequency sound
measurement function)
NL-63

“Connect” is the keyword of RION's new sound level meters.

The meter can be accessed from anywhere in the world, enabling remote noise monitoring while in the office!

The user interface has been designed to be intuitive and easy to understand for the ultimate in user-friendliness.

Newly equipped with **LAN terminals**, the meters offer various enhanced functions to connect to other communication devices and to maximize the effectiveness of noise measurement tasks.

* The meter features a protective cover for the terminal located at the bottom of the unit.

Feature

Feature-packed interface

LAN terminal

*NX-43EX is required for NL-43/53
*NX-43WR is required for listening to sound

DC power input

I/O terminal

*RS-232C, comparator output, trigger input, printer

*The unit features a protective cover for the SD card slot located at the side of the unit.

New Feature

Equipped with USB Type-C connector

— for enhanced efficiency of on-site measurement tasks —

Compatible with USB power supply

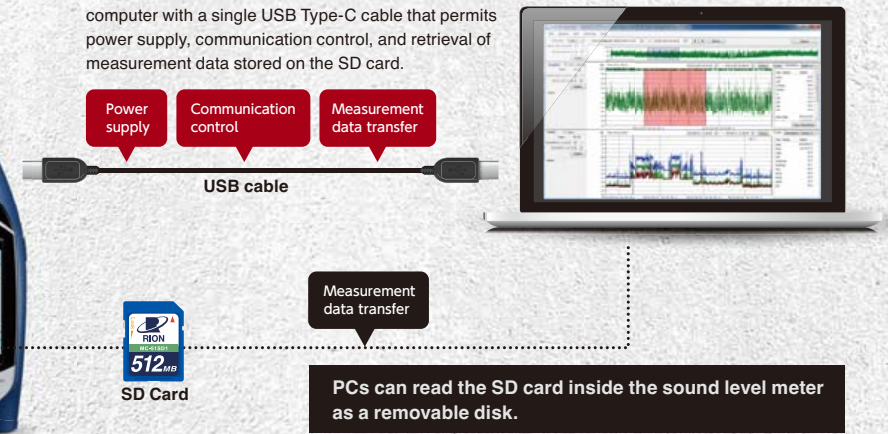

Power can be supplied from commercially available portable charger compatible with USB Type-C connections or from USB ports on PCs, enabling use at sites without other power sources.

Portable charger

Simple hardware configuration

The sound level meter can be connected to a computer with a single USB Type-C cable that permits power supply, communication control, and retrieval of measurement data stored on the SD card.

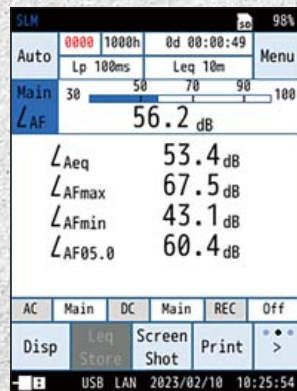

Intuitive operation without the need to refer to manual

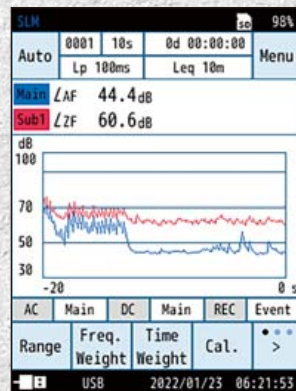

Color LCD with touch panel

Measurement display (instantaneous SPL, 2 channels)

Measurement display (calculated values)

Measurement display (Time-Level Graph)

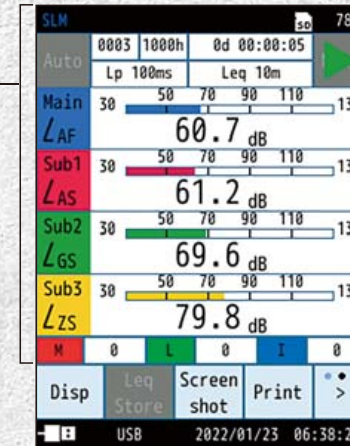

Language settings display

Convenient for noise and low frequency sound measurements

A-weighted, G-weighted*, and Z-weighted (LPF 100 Hz*) sounds can be saved in a single measurement run.

E.g.) Set with LAF, LGS, LZS (LPF=100Hz)

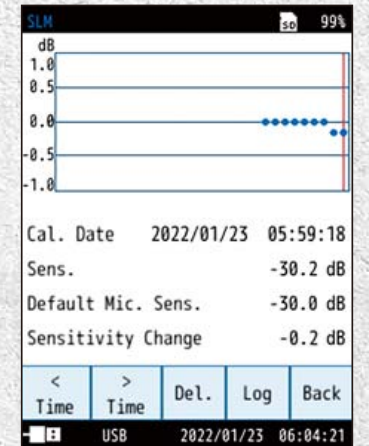

*Only with NL-63

New Feature

A single meter can measure with up to 4 different settings simultaneously and reduces measurement time

You can set 4 different frequency and time weighting and save instantaneous and calculated values.

New Feature

View and manage a unit's calibration history and save to SD card

Recording changes in microphone sensitivity leads to reliable data management.

Water resistance

IP54 water-resistant performance (except for microphone) Helps reduce risk of failure due to sudden rain showers, etc.

*Mounting the all-weather windscreen or rainproof windscreen boosts the water resistant performance of the microphone unit to meet IPX3 specifications.

Rechargeable batteries are available as more sustainable option

Sound calibrators meeting requirements of IEC 60942

Optional; see p. 9 for more information.

Comply with the international standards IEC 61672-1:2013, ANSI/ASA S1.4

Capable of various noise measurements Newly enhanced functions help achieve your tasks more comprehensively, with less effort

Optional program function list [Installing the optional programs adds the following functions]

Adding programs

Extended function program
NX-43EX

+

The NX-43EX allows users to add the NX-43WR, NX-43RT and NX-43FT.

Adding programs

NX-43WR
Waveform Recording Program

Waveform recording program
NX-43WR

NX-43FT
FFT Analysis Program

FFT analysis program
NX-43FT

NX-43RT
Oct-1/3 Octave RTA Program

Octave, 1/3 octave band analysis program
NX-43RT

Auto store function

This function allows simultaneous and continuous measurements in L_p (instantaneous value) and L_{eq} calculation (calculated values such as equivalent continuous sound pressure level, percentile sound levels, maximum sound pressure level).

— Newly added function —

L_p store cycle 10 ms 25 ms 100 ms 200 ms 1 s

Upgrade function from conventional model

Compatible with long-term environmental measurements
—allows recordings of up to 1,000 hours (1 month) or longer!

Example of recording: Approximately 8,500 hours (354 days) of recording possible with L_p store cycle of 100 ms and use of 32 GB SD card.

Comparator function

This function turns on when the open collector output exceeds the set value [Maximum input voltage 24 V, Internal resistance approx. 480 Ω , Allowable power dissipation 300 mW].

Continuous data output function

This function enables the continuous acquisition of instantaneous calculated and processed values during USB, RS-232C and LAN communication. It is convenient for designing users' own control programs where data has to be transferred continuously from the meter to the computer.

Newly added features

Three types of trigger functions

Measurement starts when a trigger is detected.

Level trigger Timer auto External trigger

LAN function

Allows remote operation of the sound level meter and remote monitoring of real-time conditions.

Four types of marker functions

Example:
Measurements of road traffic noise

- Marker1 Plane
- Marker2 Train
- Marker3 Human voice
- Marker4 Others (Dogs, Birds, Winds, Rain)

Characteristic noise events can be colored and reviewed later. By linking with Environmental measurement data management software AS-60, it is also possible to perform exclusion sound processing at marker locations.

Displays the calculated value of moving equivalent continuous sound level.

New Feature
[Leq, mov]

Extended function program NX-43EX

Compatible models

NL-43
NL-53
NL-63 (pre-installed)

*NX-43EX required for NL-53/NL-43

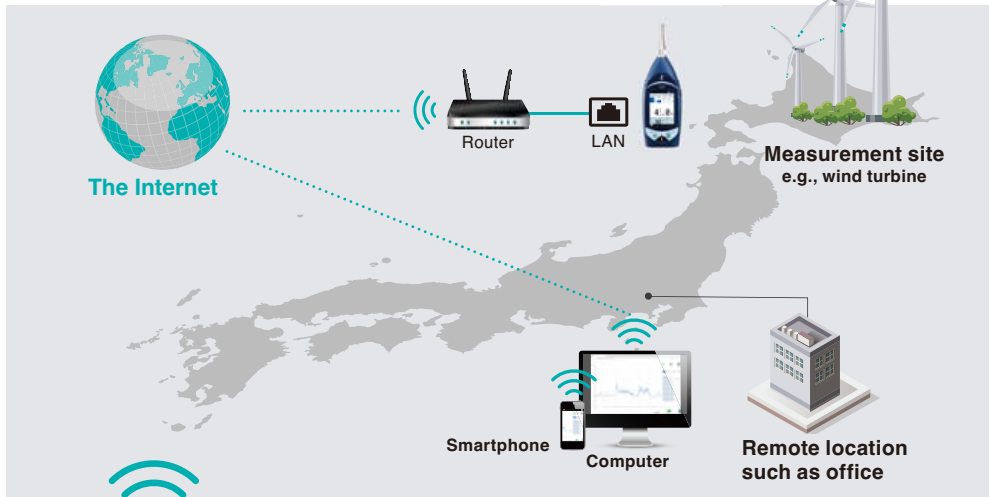

512 MB

The NX-43EX is supplied on the 512 MB SD card. The 512 MB SD card can be used as a memory card after installing the program.

Case 1

Environmental noise monitoring of remote locations

The operational status of the sound level meter can be checked remotely from a web browser, reducing the number of site visits. You can also use the meter with a mobile router for wireless communications.

Case 2

Noise monitoring of equipment and machinery at factories and site boundary lines

Connecting the LAN terminal on the sound level meter and computer with a LAN cable allows noise monitoring from the web browser.

*A NX-43WR is required to listen to the sound during noise measurement on your browser.

Web browser

By connecting to a network, remote connection via web browser of PC or smartphone is established.

Main function

- View and acquire measurement date
- Remote operation of the sound level meter (measurement settings, start and stop of measurement, time adjustment, etc.)
- Real-time audio playback (with optional NX-43WR, Supported by only Google Chrome)
- File download (Downloads are limited to one file at a time.)
- Marker function (up to four colors)

Marker function

Sections of characteristic sounds can be color-marked for later examination.

File download

Stored data can be retrieved remotely. *Downloads are limited to one file at a time.

Setting display

Measurement screen (Time-Level graph display, calculated value display)

Waveform recording program NX-43WR

Compatible models

NL-43* / NL-53* / NL-63
*NX-43EX required for NL-53/NL-43

2 GB

The NX-43WR is supplied on the 2 GB SD card. The 2 GB SD card can be used as a memory card after installing the program.

This function enables users to record sounds while processing sound levels.

Recorded data can be played back on computers and used for frequency analysis (uncompressed waveform WAVE file). The data can be processed with waveform analysis software such as AS-70 for graphing, sound level calculations, frequency analysis, file output, and sound file playback.

Ideal for long-term monitoring of low frequency sound

240 Hz and 1200 Hz are added for NL-63. This realizes FFT analysis in higher resolution and longer recording duration in low frequency sound measurement.

Sampling frequency (24 bit or 16 bit)

Newly added function

240 Hz	1200 Hz	12 kHz	24 kHz	48 kHz
For NL-63 only		NL-43/53/63		

Maximum recording time

(Assumes certain settings for auto store mode, 16 bit, and Lp store cycle of 100 ms:) *For NL-63 only

Sampling frequency	Memory card		
	512 MB	2 GB	32 GB
48 kHz	1 h	4 h	74 h
24 kHz	2 h	9 h	146 h
12 kHz	4 h	18 h	278 h
1200 Hz*	24 h	100 h	1520 h
240 Hz*	41 h	165 h	2520 h

Recording in 24 bit creates files 1.5 times larger than 16-bit recordings. Accordingly, the maximum recording time is reduced to 2/3.

Recording Modes

Manual recording

Interval recording

Level recording

Total recording

FFT analysis program NX-43FT

Compatible models

NL-43* / NL-53* / NL-63
*NX-43EX required for NL-53/NL-43

512 MB

The NX-43FT is supplied on the 512 MB SD card. The 512 MB SD card can be used as a memory card after installing the program.

FFT analysis enables sound level measurements for each frequency.

The analysis frequency range is 20 kHz with frequency resolution of 2.5 Hz (8,000 spectrum lines). Saved analysis results can be loaded and shown in an overlay graph display together with current analysis data. The maximum zoom ratio is x40. The peak list display shows up to 8 peaks of frequency lines.

Examples of the display screen (tentative)

Analysis display (x1)

Peak list display

Octave, 1/3 octave real-time analysis program NX-43RT

Compatible models

NL-43* / NL-53*

*NX-43EX required for NL-53/NL-43

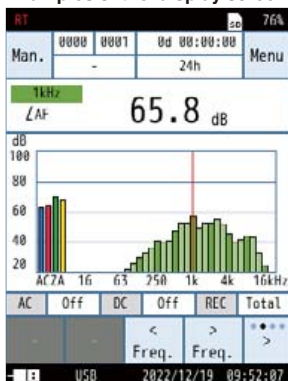

512 MB

The NX-43RT is supplied on the 512 MB SD card. The 512 MB SD card can be used as a memory card after installing the program.

Both allow measurement compliant IEC 61260-1:2014 Electroacoustics – Octave-band and 1/N (fractional) - octave-band filters Part1:Specifications

It has a function to read out the saved analysis results, superimpose it on the graph being analyzed, display the graph of the NC curve required for evaluating indoor noise, and calculate and display the NC value. Using the environmental measurement data management software AS-60RT enables recalculation and data management on a computer. It is also possible to output the voltage (AC out, DC out) of the arbitrarily selected band.

Examples of the display screen (tentative)

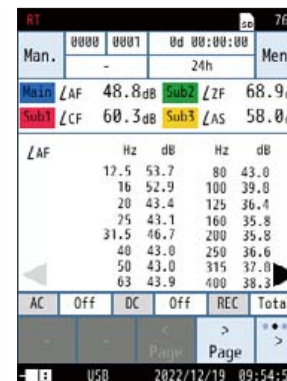

1/3 octave band analysis display

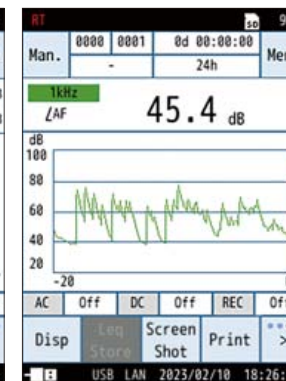

Overlay analysis display

NC curve display

Numeric display

Measurement display (Level-Time graph)

Octave, 1/3 octave real-time analysis program NX-63RT

Compatible models

NL-63

512 MB

The NX-63RT is supplied on the 512 MB SD card. The 512 MB SD card can be used as a memory card after installing the program.

The NX-63RT enables octave, 1/3 octave band analysis from 1 Hz for insight on cause of low-frequency noise which is out of audible range. The instantaneous value can be saved as well as calculated data.

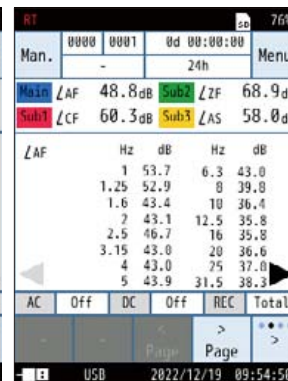

Examples of the display screen (tentative)

1/3 octave band analysis display (low frequency range)

1/3 octave band analysis display (high frequency range)

Numeric display (1 Hz~)

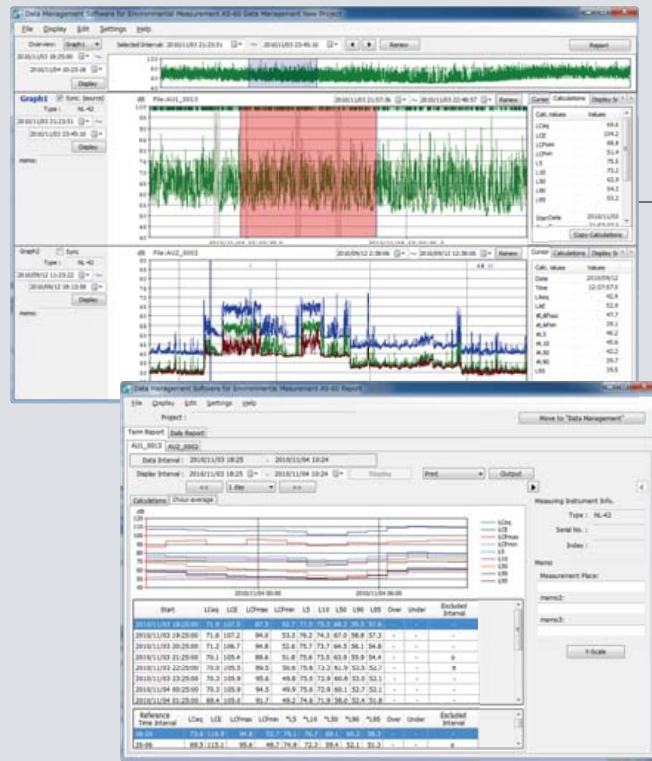

Complete software for environmental measurements

Data management software for environmental measurement AS-60

Free trial Softwares
Now available on our website

This software enables the graph display of measurement data, arithmetic processing, excluded sound processing, preparation of reports, file output, and playback of real sound files for data stored by sound level meters (NL-43/53/63, NL-42A/52A/62A, NL-42/52/62, NL-21/22/31/32).

- Easy to use
- Reports easy to prepare
- Simultaneous display of multiple data items (up to 8 data items)
- Data stored in a data recorder can be loaded (CSV file for DA-40 Viewer)
- Data combination

Report preparation screen

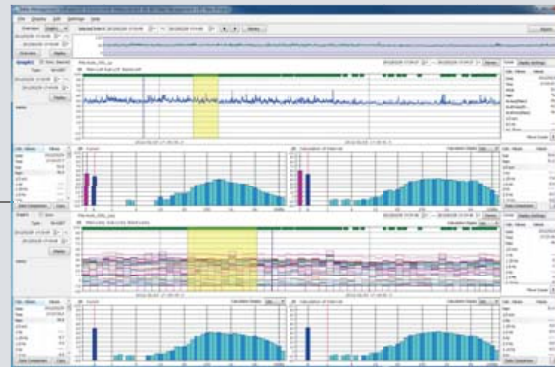

Recommended computer specifications (Common for AS-60/60RT)

CPU	Intel Core i5 2 GHz or higher
RAM	2 GB or more (4 GB recommended)
DISPLAY	XGA (1024 x 768) or more, at least 65 536 colors
OS	Microsoft Windows 10 Pro 64 bit, 11 Pro 64 bit

*The AS-60/60RT software requires the USB digital rights management key (a hardware key bundled with software).

Data management software for environmental measurement AS-60RT

(Includes the octave and 1/3 octave data management software)
In addition to the functions provided by the AS-60, the AS-60RT offers functions needed to manage data saved to computer by the NX-43RT/63RT, NA-28 or SX-A1RT.

Supported models (Only auto store data are supported, excl. DA-40 Viewer)

*1 The NX-43EX is also needed. *2 The NX-42EX is also needed.

Waveform analysis software AS-70

This software allows you to load stored WAVE files from a RION sound level meter, vibration meter or data recorder. Octave, 1/3 octave, and FFT analyses can then be performed. Playback of the real sound files is also possible.

Frequency analysis screen

Frequency analysis screen

Specifications

Waveform analysis	Calculations	Maximum value, Minimum value, Average value, RMS, Variance, Differential and integral calculus, HPF, LPF
Frequency weighting		Z, A, C, G, C to A, Lvz (vertical) (JIS C 1510), Lvxy (horizontal) (JIS C 1510)
FFT analysis	Analysis points Display data	32 to 65 536 points Power spectrum, Power spectral density, Spectrogram
Time weighting		10 ms, F, 630 ms, S, 10 s
Octave band analysis	Applicable standards Analysis frequency range	IEC 61260-1: 2014 class 1 (JIS C 1513-1 : 2020 class 1) Octave band 0.5 Hz to 16 kHz (16 bands) 1/3 octave band 0.4 Hz to 20 kHz (48 bands)

Recommended computer specifications

CPU	Intel Core i5 2 GHz or higher
RAM	2 GB or more (4 GB recommended)
HDD	20 GB free or more (100 GB or more recommended)
DISPLAY	XGA (1024 x 768) or more
OS	Microsoft Windows 10 Pro 64 bit, 11 Pro 64 bit

System construction

Peripheral devices

Sound calibrator NC-75

This Sound calibrator conforms to IEC 60942 (JIS C 1515), class 1, providing a level of performance sufficient for calibrating the precision sound level meter.

Specifications

Nominal acoustic pressure level	94 dB
Nominal frequency	1 kHz

Pistonphone NC-72B

Compliant with IEC 60942: 2017 (JIS C 1515: 2020) class LS/M, class 1/M Allows calibration with accuracy of ± 0.10 dB.

Specifications

Nominal acoustic pressure level	114 dB
Nominal frequency	250 Hz

Rain-protection windscreen WS-16

This screen protects the microphone against rain for a short period of time. The rainproof performance of this windscreen is designed to satisfy the IPX3 water-resistant specifications.

All-weather windscreen WS-15

This windscreen is designed for outdoor installations. It helps to reduce wind noise and is equipped with rainproof features that satisfy the IPX3 water-resistant specifications. It is used with a microphone extension cable.

WS15006 mounting adapter and EC-04 series cable required separately

*For All-weather windscreen WS-15, use of ST-91 is recommended.

Tripod ST-80

This stand can be used for general acoustic measurements. The sound level meter and microphone can be mounted on the stand.

Specifications

Max. Height	1460 mm*
Min. Height	570 mm

*Total height when mounted using a tripod extension column (optional): 2 060 mm

All-weather Windscreen Tripod ST-91

Designed for use with an all-weather windscreen, this tripod is suitable for unattended measurements.

Specifications

Max. Height	1820 mm
Min. Height	1160 mm

Anechoic Box AR series

The anechoic box AR series offer superior sound insulation performance as well as reject the reflected noise in the box for accurate measurement. It's ideal for product inspections or measurements in the development of small precision instruments. Compact dimensions allow positioning near your workspace. The dimensions and optional features can be customized.

*1 Use Rion fully guaranteed products. *2 NX-43EX required for NL-43/NL-53 (sold separately) *3 NX-43WR required (sold separately).

*4 Protection against harmful dust and water splashing from any direction.

Precautions on portable charger usage

Avoid portable charger with functions that monitor device power consumption and are capable of interrupting the power supply. The power consumption of NL-43/53/63 is relatively low compared to smartphones; portable charger equipped with such features may erroneously terminate power supply to the unit.

JCSS
JCSS 0197

RION CO., LTD. is recognized by the JCSS which uses ISO/IEC 17025 as an accreditation standard and bases its accreditation scheme on ISO/IEC 17011.
